## HIGH QUALITY INDUSTRIAL FABRICS

Sioen Weaving specializes in the production and sale of high-quality industrial fabrics and enjoys a high reputation in almost all segments of the technical textile industry.

Innovation, quality and logistics reliability form the basis for our long-term relationships and high estimated position in the market.

## TECHNOLOGY

Sioen Weaving has two production plants equipped with own beaming, weaving, sewing and high-tech inspection equipment.

Special looms of all technological standards are at our disposal for the manufacture of light-weight to heavy fabrics up to 4 meters of width.

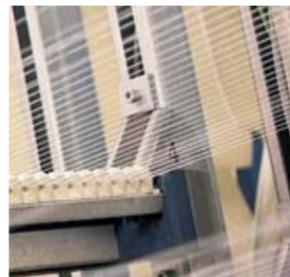

A network of carefully selected subcontractors for specific and specialized finishes on yarn and fabrics has been built-up through the years.

## TAILOR MADE

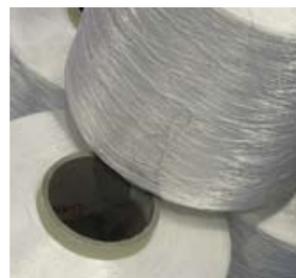

Sioen Weaving is capable of converting a wide range of raw materials such as polyester, polyamide, para-aramide, meta-aramide, polypropylene, polyethylene, nomex, and others...

Monofilaments, multi-filaments as well as spun fibers and adhesion activated yarns can be applied in counts from 20dTex till 6600dTex, twisted or untwisted.

Sioen Weaving possesses a dedicated laboratory where yarn- as well as fabric specifications can be measured and data can be stored.

## VERTICAL INTEGRATION

### SPINNING-WEAVING

Our knowhow is being enlarged with the expertise and supply of High Tenacity Yarn from Sioen Fibres Spinning and downstream knowledge in coating and other conversion processes.

## APPLICATIONS

### NAUTIC

Sioen Weaving is one of the largest producers of sailcloth. We make with excellent tensile and tear strengths as well as ultraviolet resistant properties. The unique combination with our High Tenacity Polyester mill leads to superior quality and logistic performances.

### AUTOMOTIVE

All our automotive fabrics meet the exact standards and are being tested in our own testing lab. Through the years our organization has built a reputation of consistent supplier on quality, reliability and flexibility within the automotive market.

### PROTECTIVE AND MILITARY

Sioen Weaving supplies specific fabrics for protective applications making use of unique raw material sourcing as well as production techniques and testing facilities.

### FILTRATION

Sioen Weaving takes a leading role in filtration fabrics for the food industry, heavy duty industry and chemical industry making use of a large portfolio raw materials and yarn counts.

### INDUSTRIAL FABRICS

Sioen Weaving produces > 60 million square meters of all kind of technical fabrics such as tarpaulins and truck fabrics, pool fabrics, sign fabrics, textile architecture applications.
